To whom it concerns,

Hereby we certify that all types of suspension spheres, manufactured and distributed by nv IFHS sa, are qualitatively equivalent spare parts as defined by the group exemption regulation EU 1400/2002.

In this matter we refer to German "RWTÜV" approval report n° FTP 96/24694/A/03 awarded to our company on 14 th of November 1996 and updated on the 6th of September 1998.

Above mentioned report concludes that: " Spheres of suspension manufactured by nv IFHS sa are of at least the same quality standard as the spheres produced by the car manufacturer. There are no objections to the use of these spheres, for neither technical nor security reasons."

A copy of the complete original report is available on request.

Patrick Cuyvers
